

22U Glass Front Door Network Rack

– 600x600mm

Part No.: **NX-NR-22U-6060-VG**

Short Description:

The **NX-NR-22U-6060-VG** is a high-density 22U network rack designed for organized installation of servers and network equipment in demanding IT environments. It features a toughened transparent glass front door, vented rear door, high-load-bearing frame, integrated cooling, cable management, and secure removable access panels. Its robust construction and flexible access design provide reliable equipment support, efficient airflow, and convenient maintenance for modern network and data center applications.

Key Features:

- Frame 1.5mm; Rail 2.0 mm; Others 1.2mm
- Front door & Rear door with black big lock;
- Removable side with small lock;
- Glass front door with 2*Red decorative door strips;
- 4*High-quality casters with adjustable feet;
- Blank panel on top and bottom;
- 30sets cage nuts;

Additional Information:

Feature	Description
22U High-Density Design	This cabinet is great for organizing network equipment in different places. It supports high density servers and network setups with built in cooling, power, cable management, and monitoring for smooth IT operations.
Toughened Glass Front Door	Transparent toughened glass front door provides clear equipment visibility with secure access.
Vented Rear Door	Hex-vented rear door improves airflow and cooling efficiency for installed equipment.
High Load-Bearing Frame	Robust frame structure supports up to 1000 kg of static loading capacity.
Integrated Cooling	Pre-installed 4-fan cooling system on the top panel supports effective heat dissipation.
Removable Top Panel	Spring-loaded pins allow the top panel to be removed and replaced quickly for convenient installation and maintenance.
Cable Management	Cable brush panels on the top and bottom provide convenient cable entry while helping minimize dust ingress.
Heavy-Duty Bottom Plate	Reinforced bottom plate supports up to 150 kg for additional strength and equipment stability.
Grounding Kit	Includes 10AWG grounding wires to provide a secure electrical grounding connection.
Lockable & Removable Side Panels	Secure removable side panels provide convenient access for equipment installation and maintenance.
Split Rear Door	Lockable and removable split rear doors save space and provide convenient access for servicing equipment.
Sturdy Casters & Levelers	Heavy-duty casters and adjustable levelers provide stability during movement and stationary installation.
Vertical Mounting Rails	Marked vertical rails indicate cabinet height and simplify equipment positioning and installation.
Adjustable Access Design	Front door can be configured for left- or right-side opening to improve installation flexibility and accessibility.
Brand Protection	Nexa punch tooling brand logo on the side panels helps protect brand identity against tampering.
Efficient Airflow Design	Optimized ventilation provides strong front-to-rear airflow to support the cooling requirements of high-density IT equipment.
Tool-Less Installation Support	Vertical PDUs and cable managers can be installed without tools for faster and easier cabinet configuration.
Cold-Rolled Steel Construction	High-quality cold-rolled steel construction provides strength, durability, and reliable long-term performance.
